

**Bahman Saffari** is research professor at France's Centre National de la Recherche Scientifique (CNRS) and attached to the mathematics dept. of Paris-Orsay University. French doctorate (1971) under the double direction of J.-P. Kahane (in harmonic analysis) and H. Delange (in number theory). Part of the doctoral research in number theory done at Nottingham University, England (H. Halberstam's post-graduate seminar, 1969-1971). Has been with CNRS since 1971, except during the years spent as visiting professor in the USA, Canada and Switzerland. Current research interest: number-theoretic and combinatorial methods in analysis.
